The image contains two identical diagrams side-by-side. Each diagram consists of a light gray rectangular area. A thin black curved line starts from the bottom-left corner and curves upwards and to the right, ending near the top-right corner. This line divides the rectangle into two regions. The region to the left of the curve is labeled 'segure aqui' (safe here) in black text, oriented vertically. The region to the right of the curve is also labeled 'segure aqui' in black text, oriented horizontally.

A graph illustrating a convex indifference curve in the first quadrant. The vertical axis is labeled "segure aqui" and the horizontal axis is labeled "segure aqui". The curve is convex to the origin, representing a set of points that provide the same level of utility.

A graph illustrating a convex indifference curve in the first quadrant. The vertical axis is labeled "segure aqui" and the horizontal axis is labeled "segure aqui". The curve is convex to the origin, representing a set of points that provide the same level of utility.
